TECH SKILLS

- Building Drones
- Prompt Engineering
- Research skills
- Python Programming (Beginner)
- Content Creation
- Arduino
- Canva, Clipchamp

EDUCATION

Keystone International School

JUL 2025 - JUN 2027

Cambridge AS-Level Grades - 6 As | **Predicted A-Level Grades** - 5As

Subjects: Maths, Physics, Chemistry, Maths-Further, Computer Science, General English & CIPQ

Pragnya Montessori School

APR 2021- MAR 2025

IGCSE Grades: ICE with distinction; 6A* & 2 As.

The Montessori Erdkinder Program

APR 2012- MAR 2025

Successfully completed all Erdkinder programme requirements across the four planes

COMPETITIVE ACHIEVEMENTS

Build Guild 2026 - Drone Building Competitions

APR 2026 - APR 2026

2nd Place in drone assembly and testing

Built, calibrated, and successfully flight-tested a mirco drone the prototype, demonstrating stable autonomous altitude maintenance through Altitude Hold and orientation-independent control.

SonoStep: An Assistive Navigation System

OCT 2025 - JAN 2026

National Runner-up at Young Innovators Programme 2026, IIT Kharagpur

An enhanced cane technology built by integrating a Raspberry Pi-based architecture, enabling the incorporation of a camera-based vision system for obstacle detection with real-time audio feedback, and a GPS module for point-to-point navigation.

PROJECTS & INTERSHIPS

Solar Integration in Mini Quadcopters- CIPQ

NOV 2025 - ONGOING

I am investigating the impact of solar integration on quadcopter flight time and power efficiency, under measured wind, temperature and humid conditions. CIPQ requires independent research and an in-depth study, culminating in a comprehensive 5,000-word report.

Research Internship - Space Sweepers

JUN 2025 - AUG 2025

Edutechlife in association with MECHANICA, IIT Madras

Engaged in research involving the comparative study of top 3 space debris mitigation and removal strategies built so far, focusing on their operational viability and long-term sustainability.

Workshop & Training Program - Astrophysics

JUN 2025 - JUL 2025

Edutechlife in association with MECHANICA, IIT Madras

Successfully completed a 30-day astrophysics work shop and cleared the assessment. The program covered from introduction to observational techniques and instruments to complex topics like stellar and computational astrophysics, gravitational waves, high-energy physics etc.

Robotics in Space - Summer Camp @ T-Works

MAY 2025

Designed a model CubeSat and developed multiple embedded systems projects using microcontrollers such as NodeMCU and Arduino.

FPV Quadcopter with Pixhawk Flight Controller

NOV 2024 - JAN 2025

Resolved key performance issues in a prior UAV design by transitioning from Arduino to Pixhawk 2.4.8; incorporated GPS, telemetry, and AV transmitters to enhance flight accuracy and control.

"Slow Fly" RC plane Project

S.P.A.R.K. Expo 2024 - Pragnya Montessori School

JUN 2024 - NOV 2024

Developed and tested a low-speed RC plane using key components such as a 1000KV BLDC motor, 30A ESC, and SG90 servos.

Quadcopter using Arduino Microcontroller

S.P.A.R.K. Expo 2023 - Pragnya Montessori School

AUG 2023 - NOV 2023

The most challenging project, as Arduino is not suitable for a stable flight control.

SOFT SKILLS

- Leadership Skills
- Critical Thinking
- Team Work
- Collaboration
- Theatrical Skills

CERTIFICATIONS

Completed 20+ online and offline certifications

- **Space Science, Technology and Applications** - ISRO E-Yuvika
- **Quadcopter Drone & UAV Workshop** - IIT Hyderabad
- **Interfacing with the Arduino** -University of California, Irvine
- **Google AI Essentials** - Google Career Certificates
- **Artificial Intelligence I Essentials V2** - IBM
- **Internet of Things 101 & 201** - Infosys Springboard
- **Mastering Generative AI** - BITS Pilani, Hyderabad

LANGUAGES

- English (Fluent)
- Telugu (Fluent)
- Hindi (Intermediate)
- German/Portuguese (Basic)

EXPERIENCE

Summer Intern - Defense Components Manufacturer

JUNE 2026 - JULY 2026

During the internship, I developed practical proficiency in SolidWorks system by creating parametric 3D models, assemblies, and detailed engineering designs using advanced modelling and visualization features. I gained exposure to engineering and manufacturing QA/QC cycle. I will try to apply these skills to my CIPQ solar-assisted quadcopter research, developing a 3D frame concept to evaluate solar-panel integration while considering structural design and manufacturing feasibility.

Head of Stewardship - Keystone School

JULY 2025 - ONGOING

In my role as Head of Stewardship, I serve as a role model for the school's values and provide purposeful leadership to all community and environmental stewardship programs through integrity, vision, and innovation.

I collaborated with a team of 4 ministers, 4 secretaries, and 16 council members to initiate, lead, and drive all student community programs towards successful closure. The initiatives span across technology, languages, arts, sports, sustainability, and health elements.

Team Leader - Project S.H.A.N.I. (Saturnian Hydrocarbon Analysis and Navigation Instrument)

MAY 2025 - JUN 2025

(Junior Space Scientist program, Cohort 5, Genex Space)

Led a diverse, international team of 10 amateur researchers to design a conceptual surface sample collector for the Sinlap crater on Titan, Saturn's moon.

Group Leadership roles - Pragnya Montessori School

Led and guided multiple teams of 4-8 members across all four planes: Agriculture, Independent Living, Commerce, Shopkeeping, in addition to cultural club.

Also developed and showcased functional models of various technology solutions and process improvement methodologies.

SOCIAL IMPACT & LEADERSHIP

STEM Education Fundraising Initiative

APR 2026 - ONGOING

Initiated and led a community outreach campaign that raised ₹80,000 to procure and distribute electronics learning kits to government school students, promoting equitable access to STEM education.

Independent Social Impact - Founder

DEC 2024 - ONGOING

Over the past 1.5 years, I have been independly working with 30+ students from a rural government high school in Andhra Pradesh, to guide and inspire them to explore STEM education.

None of the students had prior exposure to practical electronics or drone tech, so I introduced basic electronic components, simple circuits, and concepts aligned with their Class 9 science curriculum, culminating in students building their first functional robot. Long term goal to complete sessions on electronics and introduce them to basic drone assembling and operation.

Volunteer - Sai Nethra Foundation

JAN 2024 - MAY 2024

Collaborated as part of an 8-member volunteer team to support visually impaired individuals in academic exam preparation, enhance their communication skills and confidence, and assist with daily life activities.

HONORS & AWARDS

90% Merit Scholarship in FIIT-JEE Admission -2023

Global 19th rank - International LifeSkills Olympiad

Gold Medal-Class Topper-Silverzone Olympiads 2022-23

100% Scholarship - Aakash National Talent Hunt 2022

2nd Place-TCS Open ChessTournament - 2026

1st Place-AFC Chess Tournament - 2025

2nd Place-A2H Chess Academy Tournament-2024

3rd Place -AP State Open Chess Tournament-2024

1st Place-A1 King's Chess Tournament -2023

3rdPlace-44th Telangana State Rankings Tournaments - 2023
